

OUR SCHOOL'S PLASTIC PLEDGE

Year five team

The picture with the colourful plants and fish show a healthy coral reef. The other one with no colour and no fish is an unhealthy reef, the kind of reef we have today.

Why is plastic so bad ?

These are micro plastics .

Every piece of **plastic** ever made is still on this planet right now!

So every bottle you have drank from and put in the bin will be on this today.

Plastic has been around the world for over 60 years.
100,000 sea animals get really hurt every year by **plastic**.

Our year 5 competition!

- ▶ The winners will be announced in April
- ▶ We have created a pledge which we have to stick to if we want to succeed .

Shamblehurst pledge

Our pledge as a shamblehurst is to get rid of cling film and zip lock bags. We would like you to try use recyclable thing to wrap your lunches in and to reduce as much as possible.

These are single use plastics which are really bad for are community.

Reduce single use products

You can use beeswax raps instead of cling film.

You can also use Tupperware instead of zip lock bags.

Who has?

- ▶ There's many different types of bottles.
- ▶ Plastic bottles
- ▶ Metal bottles
- ▶ Reusable plastic bottles
- ▶ Glass bottles

There are two types of bags: plastic bags and fabric bags. Plastic bags are bad for the environment and some are reusable, fabric bags are ok for the environment they are 100% reusable.

Thankyou for listening year 1

Does Anyone Have Any Questions?
