

SHAMBLEHURST PRIMARY SCHOOL ENQUIRY PLANNING MODEL

Year Group: 5 2020-21
SHAMBLEHURST PRIMARY SCHOOL

Shamblehurst Curriculum – Medium Term Planning – Term Year 5

Active Learners	Basic Skills	Creative Learners
<ul style="list-style-type: none"> ● Seek out and enjoy challenges ● Collaborate with others ● To show commitment and perseverance ● To assess themselves and others 	<ul style="list-style-type: none"> ● To speak clearly and convey ideas ● To read and communicate in writing efficiently and effectively ● To calculate efficiently and apply skills to solve problems ● To use new technologies confidently, purposefully and safely 	<ul style="list-style-type: none"> ● To ask questions to extend their thinking ● To generate ideas and explore possibilities ● To overcome barriers by trying out alternatives or new solutions ● To connect ideas and experiences in inventive ways

<u>Concepts:</u>	Perseverance	Influence	Passion	Curiosity
-------------------------	--------------	-----------	---------	-----------

<u>Enquiry Question</u>
Curiosity and Perseverance - where would we be without them?

Mind-map

Global Neighbour

Create an invention, innovation or idea to help British farmers continue to care for the environment and become Climate Super Heroes.

English

Non-chronological report on the rocky planets.

Newspaper report

Diary and journal entries

Descriptive setting writing

Lead Curriculum subject 1

Science

Earth and space

Forces

Planning different types of scientific enquiries to answer questions, including recognising and controlling variables where necessary taking measurements, using a range of scientific equipment, with increasing accuracy and precision, taking repeat readings when appropriate recording data and results of increasing complexity using scientific diagrams and labels, classification keys, tables, scatter graphs, bar and line graphs using test results to make predictions to set up further comparative and fair tests. Reporting and presenting findings from enquiries

Lead Curriculum subject 3

ICT

Know how to design and create a more complex program to achieve a desired outcome
Know how to debug a program with increasing confidence
Know how to decompose a problem for each sub section
Identify errors and know how to correct them in programs and algorithms
Begin to identify patterns in algorithms that help to solve specific problems

Enquiry question Curiosity and Perseverance - where would we be without them?

Lead Curriculum subject 2 DT

Describe and explain the purpose of their products with increasing confidence

- Indicate, describe and explain, with reasoning, the design features which will appeal to the intended users
- Know and understand the different research types there are – surveys, interviews questionnaires and web-based resources. Use one of these to gather the views of others which will impact on their design link to the needs, wants and preferences
- Know and develop their own design technique
- Know how to use prototypes and pattern pieces in the design process
- Know how to use annotated sketches, cross-sectional drawings and exploded diagrams in the design process
- Know how to use a computer aided design program to develop and communicate their ideas

Know how to generate innovative ideas, drawing on their research and making decisions taking into account constraints, such as, resources, time and cost

<p>Key Learning From main trunks – use Skills and Progression documents to inform planning. What will the children learn?</p>	<p>How? What opportunities am I going to give the children so that they can learn?</p>	<p>Outcomes What will the learning look like? How will the learning be recorded?</p>
<ul style="list-style-type: none"> • Describe the movement of the Earth, and other planets, relative to the Sun in the solar system • Describe the movement of the Moon relative to the Earth • Describe the Sun, Earth and Moon as approximately spherical bodies • Use the idea of the Earth’s rotation to explain day and night and the apparent movement of the sun across the sky <p>Begin to plan different types of scientific enquiry to answer questions Begin to decide which variables to control</p> <ul style="list-style-type: none"> • Make accurate and precise measurements • Decide what to observe, how long to observe for and whether to repeat them • Take accurate and precise measurements using standard units • Select equipment on my own and can explain how to use it accurately • Set up a range of comparative and fair tests • Begin to explain which variables need to be controlled and why 	<p>Immerse using non-chron books. Write a non-chron report. Outdoor activity using fruit to replicate the size and distance of the solar system. Use of BBC Stargazing to support understanding. Model outside of the Sun and planets to rotate around the sun .</p> <p>Guided Reading texts to support understanding . Models and videos used to show moon phases. Moon observation diary completed observing the moon phases over a month. https://www.bbc.co.uk/bitesize/clips/z3jd7t y</p> <p>Oreo observation to support understanding of the moon phases. https://sciencebob.com/oreo-cookie-moon-phases/</p> 	<p>Model and practical evidence photos and explanation in enquire books.</p> <p>Moon diary seen in Artstrong entries</p> <p>Guided Reading evidence in enquiry book . Pictures and explanations of moon phases Practical experiment to explain the movement of the sun across the sky using shadows and tracking shadows experiment .</p>

- Explain that unsupported objects fall towards the Earth because of the force of gravity acting between the Earth and the falling object.
- Identify the effects of air resistance, water resistance and friction, that act between moving surfaces.

<https://www.stem.org.uk/resources/elibrary/resource/445275/paxi-and-our-moon-phases-and-eclipses>

Plan and carry out a practical experiment using parachutes made of a range of materials to effect the air resistance .

Friction experiments.

<https://carrotsareorange.com/experiments-on-friction/>

Demonstrate friction using a variety of experiments, making links to how scientist had to investigate different surfaces in order to understand how Curiosity and Perseverance could travel across Mars.

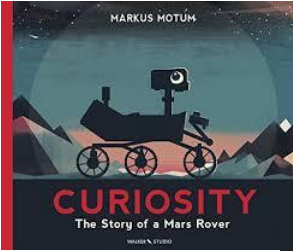

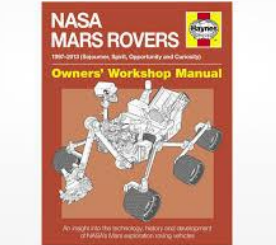

Air resistance - How can we slow the Mars Rovers down to land? - What material would be best ? - Children to conduct parachute experiments.

To identify the effects of water resistance by creating and racing streamlined boats. To explore the effects of water resistance.
file:///C:/Users/lauren.stapleton/

Planned experiment in books and pictures in books. Results from experiment and a summarising statement linking to air resistance and gravity .

To identify the effects of water resistance by creating and racing streamlined boats.

	AppData/Local/Temp/Temp1_tp2-s-296-science-forces-water-resistance-year-5-lesson-pack-4-english_ver_2.zip/Lesson%20Plan.pdf

Various Information Texts with information about planets.

A Guide to Space

<https://theplanets.org/venus/>

<https://solarsystem.nasa.gov/planets/overview/>

Distinguish between fact and opinion

Retrieve, record and present information extracted

Language for effect:

- Identify how language, structure, and presentation contribute to meaning
- Discuss how language used has an effect on the reader.

Transcription:

- Place the possessive apostrophe accurately in words with regular plurals.
- Use the first two or three letters of a word to check its spelling in a dictionary.
- Spell words, which are often misspelt.
- Use further prefixes and suffixes and understand how to add them.
- Spell further homophones
